Building Management System

Know your Neighbour, Manage your Office or Apartment in a better way

www.iGhost.com

Building Management System creates a private social intranet for your residence. Share, organize, discuss and manage everything that is essential to your residential community.

Get to know neighbours, manage feedbacks, broadcast announcements, book facilities, send reminders, generate revenue, earn reward points & lots more.

These are just some of the empowering features of Building Management System.

4

reasons to use Building Management System

● **Unity In Community**

Building Management System puts unity back into your community via the collaboration and communication features that enables residents to share & connect without compromising privacy. Share feedback, photos, send messages, add friends and more.

● **Take Control**

Manage your community and get things done in a few clicks. Broadcast announcements, send notice or billing reminders with outstanding statements to individual residents, manage facility bookings and track visitors that come into your residence.

● **Make Money**

Get shops in your neighbourhood to advertise on your community's private business directory listing. Leverage on the residents living in your community to get ad impressions that shops are looking for to make some serious money!

● **Branded Community**

Increase the value of your residence by branding your community as a modern, trendy and well managed community with a unique web presence that incorporates both design and functionality for your community. It's the next big thing for residential communities. You could even request us for a custom layout design for your community.
